

Parents as Teachers®

Being a parent is hard work!

Parents as Teachers helps you understand child development and connects you to the resources you need to make the best choices for your family. Parents as Teachers offers free personal visits, customized for the needs of *your* family, along with developmental screenings, group connections and a resource network. These components are integral in supporting school readiness for both children and parents.

How does it work?

***Family Personal Visits** are provided by a parent educator who will partner with you to support and promote your child's development through individualized activities that will prepare your child for future success in school and life.

***Developmental Screenings** provide information on the individual growth and development of your child as well as health, hearing, vision and dental checks. Annual developmental screenings can support continued growth and identify potential delays or concerns.

***Group Connections** allow for parent-child interactions, increase knowledge of ways to support child development and provide an opportunity to practice parenting skills in a group setting.

***Resource Networks** provide you with connections to information and services available in the community to support your family.

Parents as Teachers is offered to ALL families with children prenatal-kindergarten entry at no cost.
